Forty Years of Service

Akron is the Rubber Capital of the World. It is the hub of the globe-girdling rubber empires and their vast networks of retail outlets.

Akron-made products are to be found wherever wheels turn. Aside from thousands of rubber products, Akron area plants turn out matches, automobile rims, clay products, salt, dies, molds, batteries and chemicals.

Akron, with more than 50 motor freight terminals, is the center of the trucking industry. Here is the world's largest fishing tackle factory, the site of the All-American Soap Box Derby and the home of the dirigible and blimp.

The Akron Chamber of Commerce is guiding Akron's progress.

ADVERTISING DEPARTMENT
AND
BUYERS' GUIDE
OF THE
AKRON CITY DIRECTORY
1948-49

This section of the Directory contains the Advertisements and Professional cards of the more progressive business men, classified according to their respective line of business or profession. In brief, they are the men who are making business and history for Barberton. Patronize them and you will be sure of a square deal.

We have on file in our Directory Library every issue of the Akron City Directory, beginning with the 1868 edition, down to the current issue. These volumes contain a wealth of information concerning the people who were listed in the Directory during the past 78 years.

Persons listed in the earlier Directories are now only memories, but their listings in the Directory remain the same as when they were here in person.

These rare volumes, as well as hundreds of current Directories of other cities, are available for public reference, without cost,—just a part of our service.

A Burt Ventilator For Every Need

Burt engineers learned long ago that no one type of ventilator can be used efficiently for every installation. The same industrial building, when used for the manufacture of another product, presents entirely different problems in ventilation.

Accordingly the Burt Manufacturing Company offers six distinct types of ventilators each designed and built to meet the specific needs of the industry in which it is employed and the conditions to which it is applied.
