AKRON, OHIO

"THE RUBBER CAPITAL OF THE WORLD"

Akron, a northern Ohio city of 298,500 persons, located in Summit County with a population of 575,000, has gained fame through the years for outstanding leadership and contributions in many varied fields

The city is probably best known as the "rubber capital of the world." It is the hub of the globe-girdling rubber companies whose vast networks of fabrication plants and retail outlets play such an important role in our economy. This vital Akron-born industry alone represents more than four billion dollars annually in production

GIANT TIRE MACHINERY

Rubber has been the big employer in Akron for nearly half a century. The city is the headquarters for administration, sales, financing, distribution and research for B. F. Goodrich Co., Goodyear Tire & Rubber Co., Firestone Tire & Rubber Co., General Tire & Rubber Co., and Mohawk Rubber Co. Seiberling Rubber Co. is located at nearby [redacted] son. In addition there are a number of smaller specialty rubber companies in Akron.

AIRDOCK AND PORTION OF GOODYEAR AIRCRAFT CORPORATION

Goodyear Aerospace Corporation's impressive Airdock, completed in 1929, was erected to house the rigid airships, USS Macon and USS Akron, each of which was 785 feet long and had a capacity of 6,500,000 cubic feet

The Dock is approximately a semi-paraboloid shape, well described as a half of a silkworm's cocoon, cut in two the long way. It is 1175 feet long, 325 feet wide and 211 feet high. Its 364,000 square feet of floor area makes it the largest single uninterrupted space yet built

In a comparative sense, the Dock's height is equal to a 22 story building; it is the largest structure in the world without interior support; ten football games could be played simultaneously under its roof. It is so big, in fact, that the engines on the airships can be "run up" inside the structure without discomfort to workmen or danger of carbon monoxide poisoning.

In effectively launching and docking huge rigid airships, the Dock had to be designed to reduce air-current interference to a minimum. It was with this thought in mind that Dr. Karl Arnstein, GAC's retired Vice President in Charge of Engineering, specified the building as a semi-paraboloid structure.

The most unique feature of the Dock is probably its identical spherical doors with their supporting trucks and operating mechanism, with individual power plants separately housed at each end of the building. The doors are two-piece and shaped somewhat like one-quarter of an orange peel. Each of the four sections weighs 600 tons. The doors are fastened at the top by huge hollow-forged pins 17 inches in diameter and six feet long. The doors rest on 40 wheels set radially on curved standard railroad track. Time of opening or closing is approximately five minutes.

DIVERSIFIED INDUSTRY

Akron is also well known as the birthplace of the trucking industry. The enterprising rubber producers, sensing an important new market for their tires, were among the first industries to ship by truck. Today Akron is headquarters for 113 motor freight companies and 58 contract carriers with more than 17,000 trucks and trailers

Also located here is the Saalfield Publishing Co., publisher of children's books, the largest concern in its respective field.

Metal working is an important industry. The units of this industry range from small tool and die shops to big factories producing machinery used in the rubber industry and other similar types of business.

Many new industries — such as the Chrysler Corporation Stamping Plant and the Euclid Division of General Motors Corporation — have been attracted to the Metropolitan Area because of the availability of excellent plant sites, exceptional water supply, accessible raw materials, a large pool of technicians, skilled and semi-skilled workers, rail, air, water and motor freight transportation and abundant electric power at low rates.

The diversified list of other products made in Akron area plants includes chemicals and plastics, salt, clay products, paint and varnish, paper and boxboard, porcelain products such as glove forms and insulators, aircraft parts, heating and air-conditioning equipment, storm windows and doors, mattresses and upholstered furniture, concrete blocks, electric motors, wire drawing machinery, marine equipment, molds for rubber and plastic manufacturers, rubber toys, fabricated and wrought iron steel products, tools, both hand and power, and wood turnings.

FINISH LINE AT AKRON'S ALL-AMERICAN SOAP BOX DERBY

Akron has gained world wide fame as the host city for the All-American Soap Box Derby and such famous golf events as the 1960 and 1966 PGA Tournament, the American Golf Classic and the World Series of Golf

Since 1934, with the exception of four war years, the ALL-AMERICAN SOAP BOX DERBY has carved a significant place for itself as a vital youth event in America. Each year, Akron, Ohio, the home of the ALL-AMERICAN, rolls out the royal welcome mat for 250 local champions from all over the United States and many foreign countries for this "greatest amateur racing event in the world."

The entire business district is lavishly decorated in Derby colors and banners, and Main Street becomes ALL-AMERICAN BOULEVARD for the festivities during "Derby Week." To make certain each "Champ" is identified to the tens of thousands of visitors that pour into Akron, giant placards along the Boulevard feature the name of each boy and the city or country he represents.

The Akron Area Chamber of Commerce, its committee, merchants and the entire community join together to make every Derby Boy feel that he is a true champion, for each entrant in the ALL-AMERICAN has earned the honor of competing for national recognition and over \$30,000 in scholarships and other prizes by winning the grand championship in his local derby "back home."

The 250 Champs competing at Akron actually are representing some 80,000 boys who experienced the thrill of creating a racer with their own skill and ingenuity and entering in competition with other fine boys like themselves

AKRON UNIVERSITY STUDENT CENTER

As a municipal institution serving a world famed industrial area, the University of Akron strives to provide an excellent academic education for the college-age youth of the community. In addition, the University provides facilities for adult education and many civic, cultural and educational community events. In July of 1967, when Akron University becomes a State University, its facilities will provide a greater opportunity for the local community to receive an education.

Buchtel College, named for its most generous financial supporter, John R. Buchtel, became the core of the University of Akron in 1913 when all assets of the college were accepted by the City as a foundation upon which the new University would grow.

Today, students can earn bachelors' degrees in the College of Liberal Arts, Engineering, Education, Business Administration and Law

Masters' degrees are offered in all the colleges, through the Graduate Division. The Doctor of Philosophy degree is offered in Chemistry by the Buchtel College of Liberal Arts

AKRON YMCA

The Akron Young Men's Christian Association serves 34,468 members, of whom 24,827 are under age 18, in 11 branches in the Metropolitan Akron Area. Programs feature gym and swim classes, boys' clubs, hobbies and crafts, citizenship training, informal education, teen-age parties and special family activities. Attendance at these various activities annually exceeds 1,800,000.

Parcels Rates and conditions vary to different countries, call at Post Office

Service For All

Cuyahoga Falls, rich in the heritage of the Northwest Territory, is particularly proud of a special recognition bestowed upon the community. A national news magazine called the city "one of the 24 nice places to live in the United States," and the community's nearly 53,000 residents are in agreement with that view. A fine locale with excellent schools and shopping facilities, Cuyahoga Falls is a good place in which to raise a family. There are approximately 15,000 homes in the city with 82 percent owner or buyer occupied

While most of the residents work in either Akron or nearby Cleveland, the city has much to offer in industrial facilities with more than 75 plants producing rubber, food and dairy products, furniture, wood products, plastics, machine tools, wire drawing machinery and small parts. Outstanding cultural and recreational facilities, including an Olympic-size swimming pool for national A.A.U. swim meets, are provided city residents

The Cuyahoga Falls Chamber of Commerce, an affiliate of the Akron Area Chamber of Commerce, plays an important role in coordinating many activities which contribute to the city's progress.

DELAWARE BUILDING

253-9181

137 South Main Street
AKRON, OHIO

Cuyahoga Falls covers an area of 8.695 square miles at an altitude of 1,109 feet above sea level. Included in the city area are more than 100 acres of parks and playgrounds.

Founded in 1812, the city more than doubled its population between 1910 and 1920 and again between 1920 and 1930. It has more than 141 miles of streets of which more than 103 are paved, 118 miles of sanitary sewers; 134 miles of water mains and 65 miles of storm sewers.

Cuyahoga Falls offers the consumer public more than 300 retail stores, including chain department stores and independently owned, plus professional men for all types of services

The Cuyahoga Falls Municipal Swimming Pool at Waterworks Park is annually the scene of swimming meets recognized by the National A.A.U. (Amateur Athletic Union). The pool has a capacity of more than one million gallons of water, is 75 feet wide and 325 feet long.

CUYAHOGA FALLS FIRE DEPARTMENT

Cuyahoga Falls has one of the most modern, completely equipped fire departments of any city of comparable size in the State of Ohio.

Because of the department's fine fire prevention program, the city enjoys an excellent fire safety record. Only three major fires have occurred in the past 30 years.

RESIDENTIAL SECTION OF CUYAHOGA FALLS

The City of Cuyahoga Falls is blessed with an immense natural beauty and the people have capitalized on this beauty as part of the charm of both the modest and more elaborate homes. Interesting variety in style is seen as you drive throughout the community. The architectural types range from colonial to modern homes of steel and glass.

BARBERTON, OHIO

"The Magic City"

LAKE ANNA, A NATURAL SPRING-FED, TEN ACRE LAKE SITUATED ONE BLOCK FROM DOWNTOWN BARBERTON

Barberton, Ohio, a city of 36,000 population, is located in the Southwestern section of Summit County. It is probably best known as the "Magic City" because of its early rapid growth after it was incorporated in 1891. Visitors are greeted with tree-lined streets, beautiful parks and picturesque Lake Anna, which give the city a small town atmosphere even though it is noted as one of the most heavily industrialized cities of its size in America.

BARBERTON MUNICIPAL BUILDING

Barberton covers an area of 79 square miles. Included in the city are more than 126 acres of parks and playgrounds and a natural ten-acre lake situated one block from downtown Barberton.

The Barberton Area is rich in folklore and historical traditions. Once the home of the Delaware Indians of the Algonquin Nation, the area was the site of a vital portage which linked the Great Lakes and Ohio River. Prominent in the early history of the area was Chief Hopocan, King of the New Portage.

Later, early pioneers established homes and businesses in the area. Industrial growth was spurred by the opening of the Ohio Canal. Johnson's Corners, a section of the Barberton Area, became a key stop for stagecoach lines crossing the country. The Johnson's Corners area also assumed prominence during the pre-Civil War era as one of the stations in the "underground railroad," which smuggled escaped slaves into northern states.

In 1890, an Akron businessman, Ohio Columbus Barber, founded his own community following a disagreement with the City of Akron over taxes. The new town, called Barberton, was incorporated in 1891 for \$100,000. Today that \$100,000 has grown into an investment of over \$60,000,000.

EMPLOYEES AT B & W'S BARBERTON WORKS USE MODERN EQUIPMENT TO DRILL HOLES IN HEADER COMPONENTS SUCH AS THESE ARE USED IN STEAM GENERATING EQUIPMENT

Barberton's Industrial Family, which numbers over 50 firms, is headed by the community's largest company, Babcock & Wilcox, which is best noted for its steam generating equipment. Other major firms include PPG Industries, Inc., The Seiberling Tire & Rubber Company, Weather Seal Division—Georgia Pacific Corporation and Sun Corporation.

HOW MANY CHANGES IN A YEAR?

Out of every 100 People as listed in the last Directory

16% to 18% Move away or die

17% to 19% "New" people move into town or reach listing age.

26% to 29% More change their addresses or their jobs or some other vital fact that affects their listing.

(All that's left that's good)

Making a total of 59% to 66% of the People listed who have new information in some particular which can be surely found only in the **NEW DIRECTORY**

Note. These figures are from repeated checks in numerous cities and do not vary 5% in any one year.

THAT IS WHY NEW DIRECTORIES MUST BE PUBLISHED EVERY YEAR.

— I AM —

I sit in the castles of business and at the hearthstones
of many homes, mighty in my power to serve.

Through me is the power to make people talk with intel-
ligence concerning their communities

With extended hand I guide the wearied traveler, and
to others shorten the distances between destinations.

In me abides the essence of democracy, as side by side
is found all nationalities, rich and poor alike.

With uncanny certainty I unite long-lost friends and make
glad the missing heirs.

Through me are protected the law-abiding by tracing the
criminal to his hiding place.

Through me, in the friendliest way, new trade channels
are opened.

I am the key that unlocks the gate to what your com-
munity is, for all who would pass its portals.

I Am Your City Directory

SPECIAL

CLASSIFIED

ADVERTISING DEPARTMENT

AND

BUYERS' GUIDE

OF THE

AKRON CITY DIRECTORY

1968-69

This section of the Directory contains the Advertisements and Professional cards of the more progressive business men, classified according to their respective line of business or profession. In brief, they are the men who are making business and history for Akron. Patronize them and you will be sure of a square deal.

We have on file in our Directory Library every issue of the Akron City Directory, beginning with the 1868 edition, down to the current issue. These volumes contain a wealth of information concerning the people who were listed in the Directory during the past 82 years.

Persons listed in the earlier Directories are now only memories, but their listings in the Directory remain the same as when they were here in person.

These rare volumes, as well as hundreds of current Directories of other cities, are available for public reference, without cost,—just a part of our service.

ADVERTISERS WHO KNOW

That which makes any advertiser's approval worth while is the prominence he has attained in his particular line of work.

The *advertisers in the Directory* are competent judges on the subject of advertising mediums — the fact that they approve of *Directory advertising* is evidenced by their continued patronage.

KNIGHT-WARE

ACID WASTE PIPE AND FITTINGS

KNIGHT-WARE pipe is available with a complete line of standard fittings such as traps, elbows and floor drains

Made of chemical stoneware, it is corrosion proof inside and out. It resists acids and alkalis of any concentration (hot caustics and HF acid excepted)

Specify KNIGHT-WARE for dependable acid waste drain lines

KNIGHT-WARE LABORATORY EQUIPMENT

Knight-Ware Laboratory Equipment has all the properties of Knight-Ware Pipe as given above. It is available in a wide range of standard and special designs including

- Sinks
- Table Troughs
- Acid Lines
- Fume Ducts
- Tanks
- Kettles
- Sumps
- Suction Filters
- Jars
- Towers
- Tower Packings
- Valves

Write for Bulletin No. A-KW-12

KNIGHT-WARE ACID NEUTRALIZING SUMPS OR BASINS

Filled with lump limestone or marble chips, are used to neutralize acid wastes from school, hospital and industrial laboratories, also from photo-engraving departments of newspapers and printing plants

Standard and special units are made in a range of sizes to handle wastes from one sink up to an entire science building complex

PYROFLEX CONSTRUCTIONS

The term Pyroflex Construction refers to complete functional units designed by Knight engineers which are built to handle almost any type of corrosive service. Besides Pyroflex, which is a Knight developed thermo plastic sheet lining, these units may incorporate ceramics, carbon, glass, graphite, plastics, lead or any other material best suited to the individual situation. Knight will design and build complete units or line large equipment in your plant.

Send for Bulletin No. A-TL-101
