HOW TO USE THE AROON BEACON JOURNAL INDEX

Index entries are arranged alphabetically under subjects and proper names. In most instances material has been filed under specific rather than under general headings. Examples: Baseball news is under BASEBALL; news concerning the New York Central Railroad is under that name and not under RAILROADS OR TRANSPORTATION. With few exceptions names or organizations appear under the key word of the name. Examples: NEGRO WOMEN'S CLUBS IN OHIO, ASSN OF; SOCIAL WORK, NAT. CONF OF; LABOR, OHIO FED OF. Exceptions: companies and some well-established names. Some headings are subdivided by geographical and topical subheads. Examples: FRANCE - Politics and Government; SCHOOLS - Ohio - Textbooks.

The proper name of a subject heading is followed by a brief descriptive sub-entry and by a reference line. Unrelated sub-entries are paragraphed simply in chronological order. With related sub-entries continuity is maintained by arranging the items chronologically within the same paragraph. In some instances, where material is entered only under general headings (e.g., BOOKS, MOTION PICTURES, BIRTHS, DEATHS, MARRIAGES), the sub-entries are arranged alphabetically.

The reference line indicates date, page, and column. Example: M 1, p. 2, meaning November 1, page 2, column 2.

At the location of an event is not expressly designated or otherwise indicated under subject, the place of action is local.

The following are examples of index entries for a person, an organization, and a subject, with reference lines:

DREHER, P.
Injured when auto overturned, S 26, p. 4

FISH AND GAME ASSN, PORTAGE

LABOR
Viewed as having power to abolish war, poverty, and charity, ltr, D 26, 4:5.

Cross references are used to direct the reader to the proper headings or to additional material under related headings. Examples:
